

NARRATION AND VOICE-OVER

Finding the right voice to guarantee your audiovisual project conveys its message as effectively as possible requires patience and expertise.

DID YOU KNOW...?

We record in state-of-the-art, fully soundproof studios, utilizing the latest technology to produce pristine, high-quality audio that is professionally processed and edited.

Narration

A recorded voice can bring a message to life, adding nuance and expressiveness to the tone and cadence of the content. **It can be used alone**, such as in **audiobooks or radio advertisements**, or to accompany visuals, such as in videos or presentations. This can enhance the impact of the message and make it more engaging for the audience.

Voice-Over

A recorded voice plays over the original voice, which can be heard in the background. This technique is commonly used in documentaries and training materials to provide a translation of what is being said.

1 We offer a wide selection of voices in an array of languages and can manage the entire process from start to finish, including any required translation, voice selection and recording, and final mixing with music and sound effects.

2 We record in soundproofed studios with the most advanced technology to provide pristine, top-notch audio that is expertly processed and edited.

3 We can export into any format you need, including WAV, AIFF, MP3...

4 We'll work with your project parameters:

- Bit depth (16, 24, 32)
- Sample rate (44,1 kHz / 48 kHz)
- Mono, stereo, or 5.1
- Normalisation to designated dB level
